

ROOTLAMP

.....

CARROT LAMP

COSMOCOLOR - equipped with electrical fitting with plug, cord switch and double spring.

Lamp holder diameter: 3.5 cm

240 volts 50 Hz

Max 25 Watt (ADVICE MAX 7 TO 10 WATT)

Version: E 14

The electrical cable with connector is 168 cm long in total

The lamp is not used as a root lamp to warm up the light. We have consultants who have everything from 7 to 10 watt bulbs that are used to make the lamp the word and melt the vinyl! If you want the lamp to be positioned properly, place the vinyl in a good spot so that the lamp is in the center of the house. The rounded edge must be taken into account if the lamp does not die into the vinyl material. This is not intended for use in small and large vinyl units. (Toddler dolls and premieres).

Never leave the lamp on without supervision!!! When rooting, always check that the vinyl does not get too hot. Use at your own risk!

Lamps are sold separately in our webshop. www.kommersrebornart.nl
